Driver.py

Octree\_parallel\_tree.py

```
51 # include this line if you want same conditions for timing purposes
52 #InitialConditions.seed()
53 # choose the initial conditions corresponding to the settings you chose above
54
55 # initial conditions - Plummer
56 # parameters (number of particles, mass, etc.)
57 particles = InitialConditions
58
59 # initial conditions - two-body
60 # parameters (semimajor axis, eccentricity, etc.)
61 #particles = InitialConditions
```
